LEATHER GLOVE

Please read enclosed user instructions before using this product

NORDIC ELK GRIP 3.0 - BA0910

Nordic Elk grip utilizes a high-end leather which affords the wearer superior protection against mechanical risks and high temperatures. Thanks to the ergonomic shape and carefully selected materials the glove provides maximum protection with the highest dexterity and comfort. The unique glove system consists of specially treated leather – water resistant, non-flammable and liquid chemical resistance whilst still maintaining suppleness in the leather. Its waterproof and breathable membrane combined with a fire-resistant lining based on mixture of Kevlar®/Mineral makes this one of the best structural firefighting gloves on the market today.

SIZE RANGE (EU) 6, 7, 8, 9, 10, 11
